Format	Description	Focus
Symposia	**Symposia** represent a deeper dive into a particular implementation research theme presented through multiple oral presentations and facilitated based on a symposium Chair and discussant.	*Learning about latest Implementation research knowledge*
Ride the knowledge wave	When you ride the knowledge wave, you will learn about and discuss latest implementation research findings, based on two formats: • **Oral presentations (4-5 per session).** • **Poster presentations (on the morning of day 2 and whenever you're interested).**	
The Panel Club (*Don't raise your voice – Improve your argument!*)	A Panel Club gives room to **discuss *big implementation topics*** directly related to different stakeholders. They do not allow for easy answers and involve competing values and interests, cause disagreements and require comprehensive reflection.	*Engaging in a lively and edgy debate about burning implementation questions*
Yes, we can!	This is **the problem-solving arena** of the EIE2020. Your hosts want your help to figure out, e.g., how to make their interventions more widely available, get relevant stakeholders to engage, design a feasible implementation strategy or solve a totally different implementation problem. Offer your input and provide your ideas to approach a wicked problem! Each session presents you for two problems	*Contributing to collaborative implementation problem solving*
